

Stream is the video player of the Microsoft 365 environment. As soon as you open videos saved on OneDrive or SharePoint, they are played in the Stream video player. The Stream video player also offers a few extras. Among other things, you can add a description for the video, generate subtitles and create chapter skip marks. The expiry date (automatic deletion date) can be adjusted for meeting recordings.
Microsoft Stream can also be used to record and search for videos.

Ihr Nutzen

Learn how to work with Stream.

Voraussetzungen

Using the mouse and keyboard

Preis pro Teilnehmer

EUR 55,- exklusive der gesetzlichen MwSt.

Seminardauer

1 Stunde(n)/Hour(s)

Seminarinhalte

- * Introduction
- * Uploading or recording video
- * Editing video settings
